Respected sir/madam,

I am writing to express my strong interest in the Web Development Intern position at Matrox, as recently advertised. As a Bachelor of Computer Engineering graduate from AIET Gujarat Technological University and a current master's student in Applied Computing at the University of Windsor, I have cultivated a robust foundation in software engineering with a particular focus on web development. I am drawn to this role due to my passion for developing and improving web applications and my eagerness to deepen my practical experience in a team-based, agile environment.

During my previous role as a React Developer at Maxgen Technologies and as a Python Developer at LynxAI, I actively participated in daily scrum meetings, sprint planning, and code reviews, aligning with the responsibilities outlined in your job description. My hands-on experience with JavaScript along with my proficiency in full-stack web development, positions me as a capable candidate who can contribute to your projects. Moreover, I have worked extensively with development tools such as Git and have a solid understanding of Agile and Scrum methodologies, which are crucial for your team's operations.

In addition to technical skills, I bring a strong commitment to enhancing the quality of existing code through refactoring and the adoption of new technologies, as demonstrated in my projects where I improved the functionality and user interface of web applications. My proactive approach and continuous learning mindset have enabled me to successfully implement features that meet and exceed project requirements.

I am enthusiastic about the opportunity to bring my unique skills to Matrox as part of your scrum team. I am confident that my background in software engineering and my practical experience in web development will enable me to make a substantial contribution to your team. Thank you for considering my application. I look forward to the possibility of discussing how I can contribute to your ongoing projects and innovations.

Sincerely,
Smita Khristi
