Hiring Manager
FluidAI Medical
809 Wellington St N Unit 2,
Kitchener, ON N2H 5L6

Respected sir/ma'am,

I am excited to apply for the Software Quality Assurance Intern position at FluidAI Medical. Currently enrolled in the Master of Applied Computing program at the University of Windsor, I possess a strong foundation in software testing methodologies, tools, and processes. My background in software development and my passion for leveraging technology to improve patient care align perfectly with FluidAI Medical's mission to enhance post-operative care and patient outcomes.

I am particularly impressed by FluidAI Medical's innovative approach to post-operative care through advanced sensing technology. The opportunity to work with a high-performing, cross-functional team and gain exposure across the entire technical stack is immensely appealing. During my internships at Maxgen Technologies and Brainerhub Solutions, I developed and executed test plans, test cases, and test scripts for various software projects. I collaborated closely with development teams to identify and resolve defects, ensuring software quality and testability. My technical skills include proficiency in Python and Java, as well as experience in using Git for version control for continuous integration. These experiences have equipped me with the attention to detail and multitasking abilities required to thrive in a fast-paced environment like FluidAI Medical.

I am excited about the prospect of contributing to FluidAI Medical's mission and believe my background, skills, and enthusiasm make me a strong candidate for this role. Thank you for considering my application. I look forward to the opportunity to discuss how I can contribute to the success of FluidAI Medical. I am available at your convenience for an interview and can be reached via email at khristi@uwindsor.ca.

Sincerely,
Smita Khristi
